#### **Abstract**

This research paper studies language generally and discusses how men and women use language differently. It also investigates how men and women's language reflects on social attitudes along with the differences between gender and sex. The language distinctions between men and women will be highlighted in this study. It explains the effects of linguistic diversity from the perspective of gender. This study seeks to ascertain the linguistic differences between men and women as well as the distinction between sex and gender, gender's role in social processes that result in linguistic change, linguistic use and disparities in gender. The report attempts to describe the changes brought about by these differences in many aspects. The research also seeks to provide an explanation for these differences and changes based on these differences and changes. The results are to gather information about the difference between men and women to know that there are many differences between men and women and to let the people know about that.
